The 27th August 1874.—The following Circular, issued by the Comptroller-General, is published for general information :—

No. 533, dated Calcutta, the 3rd August 1874.

From—H. A. MANGLES, Esq., Officiating Comptroller-General,
To—All Accountants-General.

From replies which have lately come to hand from various parts of India, it appears to be advisable to put before District Treasury Officers, in a concise form, the various concessions which have been granted by the Government of India in order to make the Paper Currency more generally convertible and so more popular.

2. They are—

- (1) That the notes of a Paper Currency Circle should be cashed at every Treasury (district or sub-divisional) within the Circle up to the available means of the Treasury, i.e., to whatever extent they can be cashed without embarrassing the Treasury.
- (2) That notes of all Presidencies and Circles should be received at every Treasury (district or sub-divisional) in payment of Government demands, and should be cashed at every Treasury (district or sub-divisional) for the convenience of travellers.
- (3) That notes which in this way or otherwise reach a Government Treasury should be freely issued in exchange for coin or in discharge of Government obligations.

3. It has frequently been represented that difficulties have been thrown in the way of persons desirous of obtaining cash for notes at treasuries, and even that commission has been demanded for the accommodation. To prevent any possibility of such complaints in future, a form of notice in English and the Vernacular should be hung in some conspicuous place, so that all may see whether the accommodation is available.

4. To remove all possibility of complaint on the part of Officers in charge of sub-divisional treasuries of the risk incurred in cashing notes to the public, it is suggested that each subordinate treasury be provided with a new home circle note of each denomination with which to compare all notes presented for encashment. These notes would of course form part of the Officer's cash balance, but they should not be considered as available for issue to the public or for remittance to the Sudder treasury.

5. Treasury Officers should be reminded that although it is the rule and is desirable to register the name of the person from whom a note of Rs. 50 or upwards is received, or to whom it is paid, yet that the rule should be complied with only when the name of the presenter or receiver is known or is voluntarily given. The Government of India has directed that Treasury Officers must not demand such information, nor put any questions to parties tendering or receiving notes.

6. In the Resolution of the Government of India on the operations of the Paper Currency Department during the year 1871-72, the President in Council noticed "with satisfaction" the remarkable increase of note transactions at Government Treasuries in the interior during that year. It should, however, be remarked that though considerable progress was made in that year's transactions as a whole, yet that little has been done as yet in this direction out of Lower Bengal and Madras, and that, therefore, great opportunities are still open to Treasury Officers in the North-Western Provinces, Oudh, Punjab, Bombay, Central Provinces, and British Burmah, to meet the wishes of Government.

7. By the latest published figures the increase during the last four years has been—

At Treasuries under Government of India	2 lakhs.
" " in Lower Bengal	412 "
" " in N.-W. Provinces	73 "
" " in Oudh	14 "
" " in Punjab	22 "
" " in Madras	153 "
" " in Central Provinces	24 "
" " in British Burmah	9 "
" " in Bombay, a decrease of 87 lakhs.

The present rule is therefore notified for general information :—

Rule.—"If salt originally intended to be taken out of the excepted limits described in clause 4 of the Government Notification at page 2 of the Manual under a special pass be landed in such limits for the convenience of the trade, the alteration in the destination must be reported to the Board's Office, and the special Rowannah returned within 48 hours from the time that the salt was landed. The owner, however, shall be at liberty to refer to it in taking out protective documents for such portion of the salt as he may subsequently determine on removing within limits. Should a portion only of the salt originally covered by the special Rowannah be landed or sold in the aforesaid excepted limits, an exchange Rowannah, after the manner provided in Section 28 of these rules, must be taken out to cover the remaining portion of the salt which goes out of such limits. Any person failing to comply with the provisions of this rule as regards the return, within the period of 48 hours, to the Office of the Board of Revenue, of the special Rowannah in the case hereinbefore mentioned, in which this document is no longer required as a protection for the salt specified therein, shall be liable to a fine not exceeding Rs. 500."

"Certificates taken out for the removal of salt from shipboard, or from bonded golas, to places within the excepted limits, must also be returned to the Board's Office within 48 hours from the time the salt is landed in such places; and the holder of any certificate who fails so to return it, shall be liable to a fine not exceeding five hundred rupees."

Provincial Establishments and alterations in Public Works Department rules and practice consequent on the introduction of the Provincial system and other changes in the Department.

Read the following papers :—

Financial Department Resolution No. 3334 of 14th December 1870.

Public Works Department Memorandum to Financial Department, No. 805 E—G of 2nd July 1872.

Financial Department Resolution No. 1937 of 15th August 1872.

RESOLUTION.—The Governor General in Council considers it desirable now to review the arrangements and rules for appointments and promotions in the Public Works Department in connection with the recent changes involved in the formation of Provincial Services, the separation of the Military Works of the Bengal Presidency under a separate agency, and the organization of the State Railways under a Director.

2. When in December 1870 the Governor General in Council, having considered it desirable to enlarge the powers and responsibilities of the Governments of Presidencies and Provinces, directed the promulgation of Financial Department Resolution No. 3334, dated 14th December, certain conditions were laid down under which the financial control thus entrusted to them should be exercised.

3. It was intended that these conditions generally designed for all Departments should apply to all cases not otherwise specially provided for in Departmental rules, and that even in cases where these conditions were at variance with existing Departmental rules, the modification of the latter should be considered, with a view to applying these conditions generally to the enlarged powers which it was desired to delegate to Local Governments in order to carry out, as unreservedly as possible, the scheme of Provincial services therein set forth.

4. The first of these conditions, and the only exception to their general applicability to the Public Works Department, is that "without the previous sanction of the Government of India, no appointment shall be created with a salary of more than Rs. 250 a month, and no addition is to be made to the pay and allowances of any Officer if they exceed, or would after the addition exceed, Rs. 250 a month." This rule may be taken to authorize the appointment of persons by the Local Government or Administration to offices with salaries of less than Rs. 250 a month, without the necessity of obtaining the confirmation of the Government of India.

5. The Governor General in Council has carefully considered the desirability of applying this rule to the Public Works Department, and opportunity has been taken to review the existing relations between the Supreme Government and Local Governments in regard to the different classes of Public Works Establishments; the rules now laid down will remove all doubt as to their position in future.

6. First, in regard to Provincial Establishments.

7. The constitution of the Public Works Department is somewhat exceptional, and however desirable it might appear at first sight that Local Governments who have to provide funds and are responsible for the execution of

work, should select their own agents as far as possible, there are practical objections to the application of the limit assigned in the Government Resolution above quoted, which appear to demand exception in the Public Works Department.

8. The limit of salary already referred to does not mark the separation between the Engineer and Subordinate service, and although the high standard of qualifications required of the former places an almost impassable barrier between them, the lowest appointments in the Engineer service are, for obvious reasons, less highly paid than the higher in the Subordinate service. The application of this limit would include first appointments to the Engineer service amongst those which the Local Governments and Administrations might make.

9. The desirability of maintaining a high standard of qualification, and the necessity of ensuring its uniformity, have been fully discussed, and the Cooper's Hill College for the future training of the great majority of the Engineer service has been established. Consequently employment must be found for all the students passed from the Cooper's Hill College, for the Officers of Royal Engineers of whom it has been decided by the Secretary of State a total strength of about 398 shall in future be employed in this country, for the passed students of the Thomason and Presidency Civil Engineering Colleges, to the employment of whom to a certain extent the Government is pledged, and for all supernumerary officers whose services become available in consequence of reduction of establishment arising from whatever cause. Excluding the Presidencies of Madras and Bombay, which will as heretofore have their own separate establishments, it seems clear therefore that power to appoint to the Engineer service cannot be unreservedly delegated to Local Governments and Administrations until the classes above-mentioned are provided for.

10. So far as can be at present calculated, it is probable that for some time to come the demand for Engineers will be so far met by the sources of supply already enumerated, that if it were desired to place any further appointments at the disposal of the Local Governments, there would be few, if any, available, and the advantages to be derived from this patronage would be small as compared with the importance of maintaining an uniform standard of qualification. This, it is believed, is recognized by Local Governments, and it is understood to be their general desire that the first appointments to the Engineer service shall, as a rule, remain with the Government of India.

11. For these reasons the Governor General in Council is satisfied that it is not desirable to delegate to Local Governments the power of making first appointments to the Engineer Establishment of the Public Works Department, and they will, therefore, remain as heretofore with the Government of India.

12. In regard to Upper Subordinates, the chief sources of supply are the passed students of the Civil Engineering Colleges, the men of the Royal Engineers who are sent out under the conditions laid down for their employment by the Secretary of State, and artificers and other subordinates occasionally obtained from Europe, under the orders of the Secretary of State. There will occasionally, moreover, be subordinates who become supernumeraries consequent on reduction of establishment in other Provinces. The Government of India must necessarily provide for the employment of these classes. The Local Governments must therefore report to the Government of India before filling up any vacancy in the sanctioned scale of Upper Subordinate Establishment.

13. It is desirable as already explained to take the opportunity of revising the rules for promotions in connection with the establishment of the Provincial services. In the following paragraphs the several ranks of the Department will be reviewed in order with this object.

14. All promotions up to the rank of Chief Engineer will be left absolutely to Local Governments (as distinguished from Local Administrations). For the appointment of Chief Engineers, selections will be made by the Supreme Government from the Department at large. Local Governments will be invited

to make their recommendations officially, and the Government of India will be guided thereby as far as possible. The distribution of the Classes of Chief Engineer assigned to the several Administrations will depend on circumstances. The details given in the Table, Appendix A, to each Administration are those which at present hold.

15. A Tabular Statement accompanies, Appendix A, showing the numbers of Superintending Engineers assigned to each Province. The Notification accompanying shows the distribution of the absentees, the total numbers and proportions of each grade must be gradually made to conform to the sanctioned scale in the manner indicated in para. 32.

16. If, on a vacancy occurring in the class of Superintending Engineers, Local Governments have no officer on their own establishment whom they consider qualified, or if they wish for the appointment of any particular officer not on their own establishment, application may be made to the Government of India either for a particular officer, or to nominate for the post.

17. On the other hand, the Local Government will be expected to give up officers asked for by the Supreme Government in the absence of strong reasons to the contrary.

18. It will be necessary for Local Governments to submit the names of Superintending Engineers recommended for Chief Engineerships, in view to the Government of India selecting for vacancies in the Minor Administrations.

19. The Executive and Assistant Engineers now on the Classified Lists of Local Governments will remain as at present. Each officer on return from furlough, or from an acting appointment, will join the Local Government or Administration to which he stands posted.

20. Transfers will in future only be made by exchange on mutual consent of the transferring Governments, except on special occasions when the Government of India may see fit to order transfers.

21. It will, however, be understood that as heretofore any member of the Public Works Department may be called upon to serve in any part of India.

22. It will be seen from what has been already stated, that although it is considered desirable for the reasons alleged to retain the power of first appointments to the Engineer Establishment, the actual control of the Local Governments over these Engineer establishments is intended to be the same as that exercised over the Civil Departments generally.

23. The Irrigation Establishments under the Local Governments have next to be considered. These are essentially Imperial, and their strength is determined mainly by the scale of construction operations sanctioned by the Government of India and Secretary of State; but as regards promotion and general control, it is now desired to delegate to the Local Governments the same power as in regard to their Provincial Establishments.

24. The Provincial Establishments under the Local Administrations have next been reviewed, the Tabular Statements, Appendices A and B, show the strength and proportions of grades of the Engineer establishments, and a careful consideration has led the Governor General in Council to decide that with these small establishments the Government of India must retain the power of appointing and promoting Superintending as well as Chief Engineers. The Upper Subordinate establishments will remain as they now are on the lists of each Local Administration subject to the reductions shown in the Table Appendix C which should be carried out gradually by transfers.

25. The recommendations of Local Administrations for these appointments will always receive the fullest consideration.

26. Within the grades of Executive and Assistant Engineers, promotions will be made by the Local Administration without reference to the Government of India. This rule will not apply to the Andamans.

27. The Public Works Establishments which are under the direct control of the Government of India, have also been considered. These consist of two branches :—

(1).—Military Works.

(2).—Railways.

28. In these cases the appointments and promotions will continue to be made by the Government of India, but the promotion lists have been separated, and the numbers of each grade assigned, so as to make the prospects of promotion as far as possible fair. In doing this, the comparative newness and probable expansion of the Railway Establishments, as compared with that of the Military Works, has been taken into consideration. The establishments are shown in Appendices A and B.

29. The Railway list will necessarily be divided. Part will be included in separate lists consisting of the officers employed under the Government of India in the control of Guaranteed Railways, together with the chief officers of the State Railways, such as the Consulting Engineer and Director, and the establishments of the State Railways not under the control of the last named Officer. The rest will consist of one list containing the Chief, Superintending, Executive and Assistant Engineers and other establishments under the Director of State Railways.

30. Promotions will be made in the separate Military Works and Railway lists; in regard to Military Works as heretofore on consideration of the recommendations of the Inspector General, and similarly hereafter in regard to the second part of the Railway list, on consideration of those of the Director of State Railways. The fixed establishments will be gradually worked to in the manner described in para. 33.

31. And as in the case of Local Governments, all transfers between Local Administrations and these branches must receive the preliminary approval of the Local Administration and Head of the Branch before being submitted for the orders of the Government of India.

32. The arrangement by which absence for more than 12 months constitutes a permanent vacancy in the Executive grades will cease from this date, as will also the addition of 10 per cent. to the sanctioned scale for absentees. Vacancies other than those due to absence on privilege leave will be filled up by temporary promotions (full allowances being drawn accordingly), and on the return of the absentee, the temporary incumbent will revert to his former rank. It will be understood that according to rule no Officer has any claim to any particular post or charge but only to his rank in the Department, and that in regard to any particular charge, the efficiency of work must alone be considered. The same procedure will apply in the case of an officiating appointment, so that the actual effective strength of the Executive grade will remain constant. These provisions will modify the establishments of the Local Governments, and the revised scale should be reported accordingly for approval.

As a necessary consequence of these arrangements, promotions will be made from time to time as vacancies occur, and the system of Half-yearly Promotion Rolls will cease.

33. Until the permanent establishment laid down in the Tables of Appendices A and B, and those to be reported by Local Governments are arrived at, promotions will be regulated as follows :—

I.—Permanent promotions.—The number of permanent incumbents in each grade assigned to each Administration in the Classified Lists modified by Notifications of later date, and especially by the posting of absentees in the Notification of this date, will form the Provisional Establishment. On the first and second occasions of a permanent vacancy in any grade of the Provisional Establishment, that vacancy may be filled up by a permanent promotion. On the third occasion, if the Provisional Establishment be above the permanent establishment, no promotion will be made; if below the permanent establishment, two promotions will be made. The numbers in the several grades arrived at after dealing thus with the third vacancy, will constitute a new Provisional Establishment to be dealt with as

before until the permanent scale is arrived at. Any augmentation or reduction of the establishment will be held to affect the permanent establishment only. Removals or postings will be held to affect the Provisional Establishments only.

- 11.—*Temporary promotions.*—For regulating these the number of Officers actually present, together with those on privilege leave, will form the Provisional Establishment. Starting from this, temporary promotions will be made for the first and second vacancies, and the third will be dealt with as in Rule I, until the Provisional Establishment is gradually brought to conform to the permanent establishment in regard to the Officers present and on privilege leave.

34. In regard to the Accounts Branch, the circumstances are different. The Government of India has not renounced control over the expenditure classed as Provincial, although the powers of the Local Governments and Administrations have been enlarged in regard to the Provincial services. The upper grades of the Accounts Establishment form a comparatively small body which could not be satisfactorily managed if broken up in the way which would be necessary if each section of it, being in the several territories, were placed completely under the orders of each Local Government or Administration. The analogy of the Civil Accounts service points to the organization of the Accounts Establishment directly under the orders of the Government of India, through which that Government by means of its Accountant General should maintain control over the Local Public Works Departments without interfering with the freedom of action it is desired to give to the Local Governments and Administrations. It is intended therefore that the whole of the superior officers of the Accounts Branch of the Public Works Department shall remain as regards appointments and promotions one body under the direct orders of the Government of India.

35. It will be observed from the foregoing that—

- (1).—(a) All first appointments to the Engineer Establishment and to the Superior Establishment of the Accounts Branch will remain with the Government of India. (b) Promotions in the Engineer Establishment will be made as follows—

Of Superintending Engineers, Executive Engineers and Assistant Engineers by Local Governments.

Of Executive Engineers and Assistant Engineers by Local Administrations.

- (2).—In the Upper Subordinate Establishment, after all those sent out from Europe, or received from Roorkee, have been distributed, Local Governments and Administrations will, after making the reference referred to in para 12, make appointments to any vacancy on the sanctioned scale.

- (3).—The appointments and promotions of Accountants will remain as at present.

- (4).—The scale of appointments in the Lower Subordinate and Office Establishments chargeable to the Provincial Funds in all cases of salaries under Rs. 250 per mensem will hereafter not require sanction by the Government of India.

The 19th September 1874.—The following Resolution, regarding the retransfer of the town of Navadipa and the adjacent villages from the district of Burdwan to that of Nuddea, is published for general information :—

Read a petition from the inhabitants of the town of Navadipa or Nuddea, begging for a reconsideration of the decision that the town and island of Navadipa should be transferred to the Burdwan district.

Resolution.—The Lieutenant-Governor met most of the memorialists on the occasion of his visit to the town of Nuddea on 13th September, and he ascertained on the spot that this petition represents the views of the most influential and important section of the people of Nuddea; and he learned that most of the memorialists hold lands in, and were connected with, the Nuddea district on the left bank of the Bhagiruttee. His Honor also consulted the Magistrates of the Burdwan and Nuddea districts, and ascertained that no executive or fiscal advantages will be gained by transferring this small tract to Burdwan; while there are many disadvantages in its remaining part of the Burdwan district. The Magistrate-Collector of the Nuddea district, who has known the town of Nuddea and its people for nearly five years, has informed the Lieutenant-Governor that the allegations made by the memorialists regarding the wishes of the townspeople, and regarding the practical convenience of their town remaining a part of the Nuddea district, are in the main correct.

2. The order transferring the Navadipa or Nuddea tract to Burdwan was issued a few months ago, and no administrative inconvenience will result from its recall. Under these circumstances, as the wishes of the people and the opinions of the local officers are in favor of the island of Navadipa or Nuddea remaining a part of the Nuddea district, the Lieutenant-Governor is glad to be able to comply with the prayer of the memorialists; and he directs that the order transferring this island, including the Nuddea town and the adjacent lands, to the Burdwan district, be reviewed, and that the tract be retransferred to the Nuddea district. The "khal" or branch of the river which flows behind or westward of Nuddea town will form at this point the boundary of the two districts.

RESOLUTION.

SCARCITY AND RELIEF DEPARTMENT.

Calcutta, the 4th September 1874.

READ a statement showing the works of public utility constructed by private individuals in the several districts of Bengal during the year 1873.

RESOLUTION.—The Lieutenant-Governor is glad to find that the number and value of works constructed by private individuals for the public benefit in Bengal has increased greatly during the last few years.

The statements showed—

						Rs.
For the year 1871,	46	works	costing	54,800
"	1872,	69	do. do.	80,600
"	1873,	163	do. do.	1,69,715

These figures do not include the large sums which Khwajeh Abdool Ghunne and his son have given for the Dacca water-works, nor the cost of the great bridge which Baboo Soorjee Kant is building on the Mymensingh and Moortagachia road; nor the hundreds or even thousands of excellent works of tank improvement which have been undertaken during the last nine months by zemindars in the distressed districts.

2. Out of the whole expenditure the sum of Rs. 1,14,731 has been spent on tanks and wells, the object of which is to improve the local supply of drinking-water. The Lieutenant-Governor is specially glad to find that the zemindars and other wealthy persons of Bengal are spending their money on public works of this kind, for he believes that a supply of pure and wholesome drinking-water is a great want, if not the chief want, in most districts of Bengal, and especially in the tracts which have been visited by endemic fever.

3. The thanks of the Government of Bengal are tendered to each of the gentlemen named in the appended list. The Lieutenant-Governor hopes that

the list may in future years be much longer, and that great rich districts, such as the 24-Pergunnahs, Jessore, Cuttack, Backergunge, Bhagulpore, Monghyr, Dinagepore, and the districts of the Patna Division, which are now conspicuous by their absence, will appear in future lists.

4. Copy of this Resolution and of the appended statement will be published in the *Calcutta* and *Bengalee Gazettes*, and copies with translations should be forwarded by the Divisional Commissioners to each of the gentlemen named in the list.

By order of the Lieutenant-Governor of Bengal,

C. BERNARD,

Offy. Secy. to the Govt. of Bengal.

The 19th September 1874.—The following Resolution, regarding the retransfer of the town of Navadipa and the adjacent villages from the district of Burdwan to that of Nuddea, is published for general information :—

Read a petition from the inhabitants of the town of Navadipa or Nuddea, begging for a reconsideration of the decision that the town and island of Navadipa should be transferred to the Burdwan district.

RESOLUTION.—The Lieutenant-Governor met most of the memorialists on the occasion of his visit to the town of Nuddea on 13th September, and he ascertained on the spot that this petition represents the views of the most influential and important section of the people of Nuddea; and he learned that most of the memorialists held lands in, and were connected with, the Nuddea district on the left bank of the Bhagiruttee. His Honor also consulted the Magistrates of the Burdwan and Nuddea districts, and ascertained that no executive or fiscal advantages will be gained by transferring this small tract to Burdwan; while there are many disadvantages in its remaining part of the Burdwan district. The Magistrate-Collector of the Nuddea district, who has known the town of Nuddea and its people for nearly five years, has informed the Lieutenant-Governor that the allegations made by the memorialists regarding the wishes of the townspeople, and regarding the practical convenience of their town remaining a part of the Nuddea district, are in the main correct.

2. The order transferring the Navadipa or Nuddea tract to Burdwan was issued a few months ago, and no administrative inconvenience will result from its recall. Under these circumstances, as the wishes of the people and the opinions of the local officers are in favor of the island of Navadipa or Nuddea remaining a part of the Nuddea district, the Lieutenant-Governor is glad to be able to comply with the prayer of the memorialists; and he directs that the order transferring this island, including the Nuddea town and the adjacent lands, to the Burdwan district, be reviewed, and that the tract be retransferred to the Nuddea district. The "khal" or branch of the river which flows behind or westward of Nuddea town will form at this point the boundary of the two districts.

RESOLUTION.

SCARCITY AND RELIEF DEPARTMENT.

Calcutta, the 4th September 1874.

READ a statement showing the works of public utility constructed by private individuals in the several districts of Bengal during the year 1873.

RESOLUTION.—The Lieutenant-Governor is glad to find that the number and value of works constructed by private individuals for the public benefit in Bengal has increased greatly during the last few years.

The statements showed—

						Rs.
For the year 1871,	46	works	costing	54,800
"	1872, 69	do.	do.	80,600
"	1873, 163	do.	do.	1,69,715

These figures do not include the large sums which Khwajeh Abdool Ghunne and his son have given for the Dacca water-works, nor the cost of the great bridge which Baboo Soorjee Kant is building on the Mymensingh and Moortagachia road; nor the hundreds or even thousands of excellent works of tank improvement which have been undertaken during the last nine months by zemindars in the distressed districts.

2. Out of the whole expenditure the sum of Rs. 1,14,731 has been spent on tanks and wells, the object of which is to improve the local supply of drinking-water. The Lieutenant-Governor is specially glad to find that the zemindars and other wealthy persons of Bengal are spending their money on public works of this kind, for he believes that a supply of pure and wholesome drinking-water is a great want, if not the chief want, in most districts of Bengal, and especially in the tracts which have been visited by endemic fever.

3. The thanks of the Government of Bengal are tendered to each of the gentlemen named in the appended list. The Lieutenant-Governor hopes that

the list may in future years be much longer, and that great rich districts, such as the 24-Pergunnahs, Jessore, Cuttack, Backergunge, Bhagulpore, Monghyr, Dinagepore, and the districts of the Patna Division, which are now conspicuous by their absence, will appear in future lists.

4. Copy of this Resolution and of the appended statement will be published in the *Calcutta* and *Bengalee Gazettes*, and copies with translations should be forwarded by the Divisional Commissioners to each of the gentlemen named in the list.

By order of the Lieutenant-Governor of Bengal,

C. BERNARD,
Offg. Secy. to the Govt. of Bengal.
